Subject: Draft CAC email

Valmichael – The following is draft language that we would send to the CAC email list regarding activities at the TCRA site. Please let me know if you have any concerns with us sending this email prior to tomorrow's meeting as you suggested.

Thank you,
David

Dear San Jacinto River Waste Pits CAC Members:

As you know, the Respondents for the Site perform routine operational monitoring and maintenance of the armored cap with quarterly inspections and maintenance of the cap on an as-needed basis. As part of the program and as approved by USEPA, we have been taking advantage of extremely low tides to inspect the armored cap in normally submerged areas over the last week and we intend to implement maintenance activities in a few restricted locations within those areas in the following week.

*Thank you,
David Keith*
